HOUSEHOLD FOOD GARDEN

Product Code : RGHHFG | **Dimensions :** 115mm x 150mm x 110mm

This kit enables the planting of a sustainable food garden.

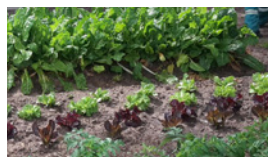

This kit consists of 12 packs of seed that can keep a family sustainably growing their own food produce for an entire year. It also comes with clear, easy to follow instructions that uses the principles of crop rotation in order to keep the soil rich and constantly providing fresh produce to harvest.

THIS KIT CONTAINS:

**SEED TO FEED
A FAMILY OF 4
FOR A YEAR**

**12 PACKS,
ONE TO PLANT
PER MONTH**

**FERTILIZER
& WATERING
SPOUT**

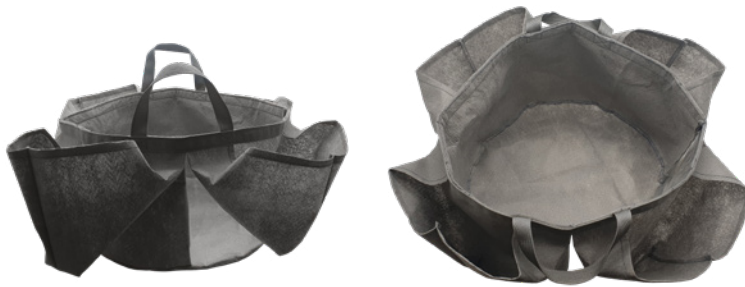

*Water spout attaches to most standard size bottles.

STACKABLE PLANTERS

BLACK

GREY

Product Code : RGSP | **Dimensions :** 450mm x 105mm diameter

These locally made stackable planters are a great way to maximise your planting area in a limited space or add some fun to your garden.

They are made from recycled PET (Coke bottles) and the organic seed tape sachets save up to 80% of water in the germination phase. These Reel Gardening planters are stackable and can fit up to four planters stacked upon each other. This means you can grow vertically which is perfect for people with limited ground space for their vegetable garden.

COMES WITH ALL YOU NEED TO START GARDENING!

(Planter Pod, Grow
Guide, Seed Tape
Sachets, Organic
Soil Food, & Water
Spout Bottle
Attachment)

JUST ADD SOIL!

BEE FOOD SPRING

GREAT FOR POTS

Product Code : RGBFS | **Dimensions :** 37mm x 90mm x 14mm | **Weight :** 6g
Product Barcode : 6 009802 424247

PLANT IN SPRING & SUMMER

CONTAINS:

3 varieties of plants from the Reel Gardening Range:

Basil will not only attract bees to your garden, but it is also a delicious herb that adds a complimentary flavour to all tomato dishes. Basil grows best in the warm weather of summer and spring and should be planted in full sunlight.

Nasturtium flowers and leaves are edible. They are used in herbal medicines for colds and flu and can help with the formation of new blood cells. Bees love to climb in and feed on nasturtium flowers. Nasturtiums can be planted all year round, in full sunlight.

Green Beans are easy to grow, full of fibre and are a great source of protein. Not only do bees love the nectar from bean flowers, but they are also very good for your soil. Green beans add nitrogen to the soil which improves its fertility. Beans need to be planted in full sunlight in spring and summer and can be grown in pots or directly in the ground.

2 planting sachets of each 425mm length of each

BEE FOOD AUTUMN

GREAT FOR POTS

Product Code : RGBFA | Dimensions : 37mm x 90mm x 14mm | Weight : 6g
Product Barcode : 6 009802 424070

PLANT IN SUMMER, AUTUMN & BEGINNING OF WINTER

CONTAINS:

3 varieties of plants from the Reel Gardening Range:

Borage is perfect to plant in full sunlight, all year round. It will take between 1 and 2 weeks to sprout, and will mature in 2 months. Not only do bees love borage, but you and your soil will too. This medicinal herb has intense blue, edible flowers that have an appealing, mild cucumber taste. The borage plant will grow to about 60cm tall, and can be grown in containers or raised beds.

Garden Peas are easy to grow, resilient to the cold and the more peas you pick, the more the plant will produce! Peas should be planted in autumn as they do not enjoy the heat. The plant will flower in winter, feeding the bees when they need it the most.

Pansy flowers are a lovely addition to your garden, they are bright and come in various colours. They can grow through any season but perform best in cooler weather and are a great source of food for bees in winter. Pansy flowers are edible and are mostly used in cake decorating. They have a beautiful fragrance which said to be perfume-like. Pansies should be planted in full sunlight.

2 planting sachets of each 425mm length of each
